DRIVEWAY GATES - HISTORIC

On the application of **JOVAN TODOROVICH**, 109 Elm Street, Jovan Todorovich is here to represent the applicant. A sign is posted but there are no affidavits in the file. The board doesn't have jurisdiction over the application. Mr. Todorovich returned with an affidavit but it is not notarized. Mr. Robinson had this stamped as received tonight, Mr. Todorovich will need to get this notarized tomorrow. The gates will be black. The lanterns will be on top of the gate. There are no details. This will be a dome and it will not be frosted. Chair stated that this will be too bright. Mr. Todorovich will use frosted lenses now, with 30 watt bulbs, one on each side. The white wood panel will match the house. The survey was penciled in with the gates by the architect. R. Coburn stated that this neighborhood doesn't have a lot of gates in the area. Black painted metal gates are a bit modern for this area. The panels on the post are ok. Mr. Todorovich has an alternative plan made from wood. J. Brodlieb stated that there are about 60 houses on Elm and only 3 gates. J. Brodlieb stated that this is not compatible with the neighborhood and is not in favor of it. Mr. Todorovich wants the gates for deer. J. Brodlieb stated that only an 8' fence surrounding the property will keep them out. If the gate was set back 50' from the street it would be more favorable. The applicant removes the gate from the application. He would like the columns and the lights only. There are no lights on Elm Street. Mr. Studenroth stated that globes surmounting the posts would be concerning. In this neighborhood and the scale of the houses, this would be too estate like. Details are needed.

MOTION by C. Redding, seconded by S. Stevenson

To **approve the applicant's request for adjournment on the application of JOVAN TODOROVICH.**

This is on a private road and is not in the historic district. The reference to the railing was presented as well as to the chip and dale. The window on the garage was removed and replaced with an arched window. The main house parts of the garage area have been simplified. The cupola has been drop in height and reduced in width. They want to retain it in order to articulate the center line of the garage. A letter of support from the neighbor across the street was submitted. The chimney pots have been simplified and reduced in height as well as the chimney. The cupola is reduced to 3'7" in width and 5'1" in height. The weathervane has been removed as well. The carriage house door was changed to a man door. The grill configuration of the windows has been simplified as well. A color rendering was submitted. The gable has been clipped as well. The chip and dale balcony has been removed as well. Chair feels that this is a cleaner look. J. Brodlieb is concerned about the vaulted windows above the front door. S. Stevenson needs to think about it, it its her first time seeing this tonight. R. Coburn questioned the door on the garage, this is not a rear door, just designed to look like one. The board is happy with the changes in simplified. R. Coburn feels that the window on the garage is too large. There is a letter in the file from a neighbor that is concerned with screening. Chair feels that with the amount of detail being done to house, that the applicant will take care of the landscaping. S. Stevenson stated that these plans have not been seen by anyone other than the Board. However it was submitted on Friday afternoon. There was no public comment regarding the architecture. Therefore the rest of the board is not concerned. The cupola will be reduced by 1'. The architect will marked the plans dated 5-11-18.

The hip roof will be maintained, the existing dormer will be maintained. Wood shingles for the roof and siding will be used. The patio in the rear is bluestone. There is a rear covered porch. R. Coburn questioned the dormer being too prominent, he asked if it could be set back a couple feet. The house will be 30' long. S. Stevenson questioned the dormer as well. The mullions will be black. The dormer is at the same level as the pitch of the roof. R. Coburn suggested breaking up the continual line of the house with a vertical trim board left of the door similar to the one that is on the right corner of the house.

MOTION by C. Redding, seconded by S. Stevenson
To **approve the application of STAVROULA GEORGALLIS.**

On Vote: Chair, S. Stevenson, J. Brodlieb, C. Redding, R. Coburn

There is a chip and dale railing on the second floor. White trim, white window, white columns, cedar single siding and cedar roof will be used. There is a detached garage. There are diamond paned windows above the entryway. The second story deck in the rear is accessible. The side yards are 55' and 43'. S. Stevenson would like the door simplified and the eyebrow window simplified. There are several different glass cuts proposed in her opinion, the diamond panes being removed would help. Some of the roofs are copper. There are a lot of shapes going on in R. Coburn and Chair opinion. A landscape plan was requested. C. Redding would like it simplified as well. Chair asked for a color rendering. The chimney is red brick. Detail of the house chimney was requested.

will be zinc coated copper. The roof porch doesn't wrap around. The board isn't crazy about the metal roof. An alternative should be presented or a color rendering to maybe prove to the Board that is disconcerting. Mr. Studenroth stated that they used to be painted, but never the zinc coated color. This is a modern take.

MOTION by C. Redding seconded by S. Stevenson

To **approve the applicant's request on the application of OMALLY & FLANAGAN.**

On Vote: Chair, S. Stevenson, J. Brodlieb, C. Redding, R. Coburn

On the application of **SURF HOLDINGS I LLC**, 26 Hill Street, Douglas Moyer is here to represent the applicant. This is not a contributing structure and not in the historic district. The building is in disrepair. The first story is a large shed roof. The roof has been leaking and there are double gables with valleys on the second floor roof. The framing is soaking wet and its moldy. They will removed the second floor and replaced with a shed roof pitched to the rear. The footprint will remain the same. This is non-conforming. The rear wall will be made to 8' now. This will be all stucco, light gray stucco color and white trim. The front will remain the same. The first floor use will be maintained. New windows are proposed for the second story. The second floor will be maintained as an apartment. The shutters are the second floor window will be removed. J. Brodlieb likes the shutters and that they remain. They will consult with the owner regarding keeping them. The sign will be kept as well. The roof will be white.

On the application of **DEASY & REDL**, 150 Breese Lane, Steve Caputo and Dan Contelmo are here to represent the applicant. A front porch and second story addition is proposed. The ganged windows are without shutters. R. Coburn is concerned about the size of the pediment, the ridge line is high for a second ridge line, and lastly the gable over the dormer on the garage he was concerned was too high and large. Chair asked for a color rendering. C. Redding feels that the ridge height is out of portion and needs to be balanced out. The trim would be white, the shutters will be black. The gables are different angles. It was asked that it be lowered a bit more. R. Coburn stated that this not a major issue for him and he would still vote in favor of the application.

MOTION by C. Redding, seconded by S. Stevenson

To **approve the application of DEASY & REDL.**

On the application of **ALFRED & DENISE HURLEY**, 198 South Main Street, Siyu Liu is here to represent the applicant. S. Stevenson disclosed that she called the architect for a site visit and the architect agreed and said that the caretaker would meet her at the site. She added that she wanted to discuss the plan with her. S. Stevenson called and told Siyu Liu that she could not discuss the application but would like five minutes to view the site with the caretaker. Ms. Liu then told S. Stevenson that the owner wanted her to cancel the site visit. Chair has a problem with the site visit refusal saying it was disrespectful of the ARB. S. Stevenson also noted that Ms. Liu sent her a letter that she returned unopened. This is a flag lot and the proposal is to renovate the existing poolhouse and to add a trellis. Photos were submitted to the record. The architect explained that the rafters are rotted and the caretaker wanted to replace them but a stop order was issued by the Southampton Building Department. S. Stevenson noted that the original poolhouse or play house as it is listed on some plans has a square footprint and the building in the proposal before the Board has a rectangular bump out that does not appear in any building plans she could find. The Board has asked for documentation such as previous building plans to provide information about the rectangular shape of the poolhouse in the application before them. The architect claims there is BOH approval for the bathroom added to the pool/play house. Ms. Liu will return to the next meeting.

MOTION by C. Redding, seconded by R. Coburn

The brick foundation will be exposed and windows will be added. On the north side, the broken pediment at the front door would be widened and sidelights added. The window over the door will be kept with details but the muttons would be simplified to a 9 light window. The railings on the front northern porch would be simplified to a painted wrought iron railing as was in 1931. The round

columns will be changed to square columns. It will be re-shingled and painted white. The east wing two small windows will be added to flank the bay window. On the west wing the large arch window on the lower cellar level will be reduced in size to match to existing arch windows that exists already. The three windows on the first floor will have added lights. The window on the second floor on the west side will be moved slightly to group them together. There is a pre-fab door on the west side and some stock windows, this will be changed to a conservatory type window. The closest point of the house is 300' from the ROW. No one will see any of these changes. The slate roof will be replaced. The footprint will be kept the same. On the eastern end the gable will be changed to a hip. The archway below on the western end will be removed and replaced with a smaller configuration of an arched window. Two bays of the porch will be enclosed. The windows will all be replaced. West of the entrance stair the windows have been enlarged slightly. One light taller has been added to the first floor windows on the south side. The far west extension on the south side has been treated the same way as on the north side. SDL for hurricane rating windows will be used. The east elevation has an added staircase and the rod has been modified. There are a lot of small changes. This is a contributing structure. Mr. Studenroth needs to evaluate what features would need to be preserved, the changes need to be cataloged. Mr. Studenroth would like a site visit and he will be communicating with the applicant. There will be a screened porch on the eastern end of the southern facade. C. Redding would like to make a site visit as well.
